

PROFESSIONAL SUMMARY

Aspiring Product Manager with a unique blend of **3+ years** of experience building scalable cloud applications at Accenture and hands-on PM experience through an M.Tech in Product Design & Management at IIIT Hyderabad. Proven ability to collaborate with engineering, research, and business teams to ship features, optimize systems, and drive measurable impact using data-driven decision-making.

EXPERIENCE

- **Teaching Assistant – Software Systems Development** Aug 2025 – Dec 2025
IIIT Hyderabad *Hyderabad, India*
 - Mentored **60+ graduate students** in Python, MERN stack, and REST API design, guiding end-to-end development of scalable, user-centric software systems.
 - Collaborated with faculty to **design project requirements** and evaluation rubrics aligned with real-world product standards, enabling prototypes that balanced usability and scalability.
 - Facilitated **weekly review** sessions to refine technical trade-offs, usability enhancements, and deployment strategies, achieving **85% production-ready project benchmarks**.
- **Product Management Intern** May 2025 – Aug 2025
iHub-Data (IIIT Hyderabad) *Hyderabad, India*
 - Evaluated **40+ research papers** in mobility and healthcare to pinpoint commercialization opportunities; proposed **3 high-impact use cases** that shaped the Q4 innovation roadmap and unlocked new revenue streams.
 - Spearheaded market research and competitive analysis for dataset platforms, uncovering monetization gaps that drove a projected **12% ARR** through targeted pricing models.
 - Championed a dataset preview feature by drafting the PRD and UX flows, securing stakeholder buy-in and integrating it as a flagship Q4 deliverable to boost user engagement by **25%**.
 - Facilitated cross-functional sessions with researchers and engineers to prioritize latency and UI/UX improvements, enhancing platform adoption.
- **Software Engineer (Analyst)** Apr 2021 – Jul 2024
Accenture *Pune, India*
 - Designed and developed a full-stack retail client platform from the ground up using React and .NET Core, integrating user feedback to deliver intuitive e-commerce workflows supporting **10K+ daily transactions**.
 - Modernized a legacy application to .NET 6 on Azure using containerization, **reducing API latency by 30.3%** and **lowering compute costs by 15%** for high-volume retail users.
 - Migrated key API endpoints from REST to GraphQL, shrinking payload sizes by **30%** and accelerating page loads, correlating with an **18% drop in cart abandonment rates**.
 - Engineered CI/CD pipelines with Azure DevOps to automate deployments, **cutting release cycles by 60%** and reducing post-launch defects by **25%**, enabling faster product iterations.
- **Data Science Intern** Aug 2018 – Apr 2019
Gauss & Riemann Scientific (now Chistats) *Pune, India*
 - Developed an OCR and NLP-based **ML pipeline** to automate healthcare invoice extraction, **reducing manual processing time by 70%** and enabling scalable data ingestion.
 - Applied **case-based reasoning** and semantic analysis to boost classification accuracy, structuring outputs for seamless integration into client analytics tools.

RELEVANT PROJECTS

- **EquiFocus: AI-Powered Wellness Planner**
 - Led user research with 25 students to identify stress patterns; designed AI-based scheduling system to manage tasks and proactively schedule "wellness windows" for balanced routines.
 - Pilot testing resulted in 20-25% reductions in reported stress/anxiety and 12-15% gains in perceived focus/daily productivity vs. traditional planners.

- **FPL Team Predictor: Fantasy Football ML Engine** [↗](#)
 - Developed an end-to-end ML pipeline to predict Fantasy Premier League (FPL) player performance, leveraging multi-season data and position-specific regression models.
 - Optimized squad selection engine that generated a 15-player team under real FPL constraints (£100M budget, valid formation, max 3 players per club), improving predicted total points by 12% over baseline heuristics; validated via A/B squad simulations.
- **NexWander: Tourism Marketplace**
 - Designed a two-sided travel platform enabling rural guides to onboard digitally; conducted user testing with 15 users, **reducing onboarding time by 40%**.
 - The prototype successfully onboarded **16 pilot organizers** from two remote regions, demonstrating that the platform's simplified listing tools were effective for non-digital native businesses.

EDUCATION

- **IIIT Hyderabad** Hyderabad, India
Master of Technology in Product Design and Management *July 2024 – Present (Expected 2026)*
 - **Relevant Coursework:** Product Management, User Research Methods, Design Thinking, Statistical Methods in AI, Neuroeconomics, Business Finance
- **Dr. Babasaheb Ambedkar Marathwada University** Aurangabad, India
Bachelor of Engineering in Computer Science and Engineering *August 2015 – June 2019*
 - **Relevant Coursework:** Data Structures, Operating Systems, Database Management System, Software Engineering

SKILLS

- **Product:** Product Strategy, User Research, Product Design, Prototyping, A/B Testing, Stakeholder Management, Product Marketing, Agile Methodologies, Stakeholder Communication
- **Technical:** Python, C#, .NET Core, SQL, React, Machine Learning, FastAPI
- **Tools:** Azure, Docker, Figma, Mixpanel, Jira, Google Analytics, Microsoft Clarity

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:**
 - Microsoft Certified: Azure AI Fundamentals [↗](#) (July 2024)
 - Microsoft Certified: Azure Data Fundamentals [↗](#) (Nov 2023)
 - Cloud Digital Leader Certification [↗](#) (Aug 2023);
 - Microsoft Certified: Azure Fundamentals [↗](#) (Apr 2022)
 - Red Hat Certified System Administrator [↗](#) (Jan 2017)
- **Achievements:**
 - 3rd Place, The Deccan CTF [↗](#) (Oct 2025)
